

Columnar Apple

Suncats

Ak 74-25-97

‘Waltz’ x ‘NN’

- growthy variety; suggested rootstocks: M26, P60, MM106, P14, M7

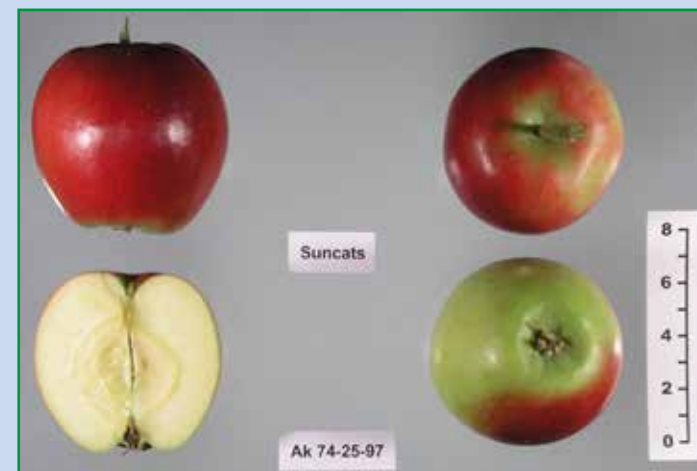

- shape and colour like ‘Pinova’, partly red; precocious; penetrometer value at harvest about 7.0
- long harvesting period, good flavour, smooth acid; limited storability

- insusceptible to apple scab, mildew, cancer and aphids; climatical very robust; this early autumn apple has a very good quality for ecological production
